SUMMARY

Final-year ECE undergraduate with hands-on experience in **AI/LLM engineering** and **full-stack development**. Built production-grade RAG pipelines, vector search systems, and on-device ML applications using LangChain, FastAPI, and TensorFlow Lite. Strong foundation in **REST API design**, **Docker-based deployment**, and **CI/CD workflows** with real-world internship experience across hybrid and remote environments.

EXPERIENCE

Site Guru Pvt. Ltd. | Full Stack Developer Intern

Apr 2025 – Jul 2025

Hybrid | *Vue.js, Node.js, Express.js, SQL*

- Translated client requirements into actionable specs, delivering **5+** full-stack modules across **3+** projects with **25%** fewer revisions and **20%** faster releases
- Streamlined **SQL queries and indexing**, reducing API response latency by **30%** and requirement revisions by **25%**
- Collaborated across teams to Resolved **15+** **production bugs** across frontend and backend layers, improving deployment stability and system reliability

ADM TutorX | Frontend Developer Intern

Oct 2024 – Dec 2024

Remote | *React.js, Tailwind CSS, REST APIs*

- Crafted **10+** reusable **React.js** and **Tailwind CSS** components, accelerating dashboard feature delivery and ensuring UI consistency across modules
- Integrated **RESTful APIs** for real-time data fetching and refactored component logic, cutting code duplication by **30%**
- Debugged **8+** **UI and API issues**, achieving stable, cross-browser performance across all dashboard features

PROJECTS

MedRAG | Python, FastAPI, LangChain, Pinecone, HuggingFace, Ollama, Docker, JWT

[GitHub](#)

- Architected an end-to-end **RAG pipeline** indexing **600+** medical pages via **HuggingFace** embeddings and **Pinecone** vector search, orchestrated with **LangChain** and **Ollama LLM** — achieving **40%** higher retrieval accuracy over baseline prompting
- Designed a **FastAPI** backend with **JWT** auth, **Docker** + **Nginx** containerization, **GitHub Actions** CI/CD, and **Pytest** test suites for production-grade deployment

LeafGuard | Flutter, Dart, TensorFlow Lite, MobileNetV2, GradCAM, SAM

[GitHub](#)

- Engineered a fully offline **Android** app with fine-tuned **MobileNetV2 CNN** (224×224, 3-class) via **Flutter** and **TFLite**, integrating **SAM** segmentation and multi-stage validation within a **sub-10MB** footprint
- Configured **GradCAM** explainability, **HSV-based** spot counting, stage classification, offline **PDF export**, and **multilingual support** (English, Malayalam, Tamil)

Rescue Meals | MongoDB, Express.js, React.js, Node.js, JWT, Socket.io, Razorpay

[Live](#) | [GitHub](#)

- Architected a production-ready **MERN** food donation platform with **3-role architecture** (donor, volunteer, admin) supporting real-time donation tracking and volunteer coordination
- Implemented secure **JWT authentication**, **RESTful APIs**, geolocation-based nearby food discovery, and real-time delivery updates using **Socket.io** and optimizing **MongoDB** indexing to reduce data retrieval latency by **25%**

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, Dart

Backend & Web: Node.js, Express.js, FastAPI, React.js, Flutter, REST APIs, Tailwind CSS

AI & LLM Engineering: LangChain, HuggingFace Transformers, Ollama, RAG Pipelines, Vector Embeddings, Prompt Engineering, NLP, Scikit-learn, TensorFlow, TensorFlow Lite

Databases & Messaging: MongoDB, MySQL, PostgreSQL, Pinecone, FAISS, ChromaDB

Cloud & DevOps: Docker, Docker Compose, Nginx, GitHub Actions, AWS, Git, CI/CD, Linux

Data & Testing: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Pytest, Postman, Jupyter

EDUCATION

Indian Institute of Information Technology, Kottayam

Nov 2022 – May 2026

Bachelor of Technology in Electronics and Communication Engineering

ACHIEVEMENTS

Competitive Programming: Solved **200+** DSA problems on **LeetCode** and **GFG**, strengthening algorithmic thinking, time complexity analysis, and systematic debugging skills

Hackathons: Selected among **top teams** at **SIH 2024** Internal Hackathon for **SchemeHub** — a platform simplifying government scheme discovery and eligibility matching for citizens; presented a **HealthTech** solution at **Hackzilla**

Hackathon among **200+** participants.
