EDUCATION

Indian Institute of Information Technology, Kottayam

Nov 2022 – May 2026

B.Tech in Electronics and Communication Engineering

CGPA: 7.79

EXPERIENCE

Site Guru Pvt. Ltd.

Apr 2025 – Jul 2025

Full Stack Developer Intern | Hybrid | Vue.js, Node.js, Express.js, SQL, RESTful API

- Delivered **5 full-stack modules across 3 client projects**, reducing client revision cycles by **25%** and accelerating release velocity by **20%**.
- Optimized SQL queries and indexing strategies, cutting API response latency by **30%**.
- Diagnosed and resolved **15+ production bugs** across the full stack, reducing post-release defect rate and ensuring deployment stability across all 3 client projects.

ADM TutorX

Oct 2024 – Dec 2024

Frontend Developer Intern | Remote | React.js, Tailwind CSS, RESTful API

- Architected **10+ reusable** React.js and Tailwind CSS components, enforcing UI consistency and accelerating feature delivery by **20%**.
- Integrated RESTful APIs and refactored components, eliminating **30%** code redundancy and improving maintainability.
- Diagnosed and resolved **8+ critical** UI and API defects, ensuring consistent cross-browser stability across all features.

PROJECTS

MedRAG | Python, FastAPI, LangChain, Pinecone, Hugging Face, Ollama, Nginx

[Live](#) | [GitHub](#)

- Developed and deployed a production-grade **RAG pipeline** using FastAPI and LangChain, integrating Pinecone vector search and Hugging Face embeddings to answer medical queries across **600+ medical documents**.
- Achieved **40%** improvement in retrieval quality via **vector search optimization**; established CI/CD with Docker, Nginx, and GitHub Actions, including JWT authentication and Pytest coverage.

Rescue Meals | Node.js, Express.js, MongoDB, React.js, JWT, Socket.io, Razorpay

[Live](#) | [GitHub](#)

- Engineered a scalable **4-role RESTful backend** (donor, NGO, volunteer, admin) with JWT authentication, geolocation queries, and real-time notifications via Socket.io.
- Built a responsive React.js frontend with role-based dashboards, reducing data retrieval latency by **25%** via MongoDB indexing and integrating **Razorpay** with transaction-safe payment flows.

LeafGuard | Python, Dart, TensorFlow Lite, MobileNetV2

[GitHub](#)

- Fine-tuned **MobileNetV2** with TensorFlow Lite and SAM segmentation to build a fully offline, **on-device Cardamom disease detection** system within a **sub-10 MB** footprint.
- Implemented GradCAM explainability, HSV preprocessing, multi-stage classification, and offline PDF report generation with **trilingual support (English, Malayalam, and Tamil)**.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, C

Web Development: React.js, Node.js, Express.js, FastAPI, Socket.io, Vue.js, HTML5, CSS3, Tailwind CSS

Databases: MongoDB, MySQL, PostgreSQL, Pinecone, FAISS, ChromaDB

AI and Machine Learning: LangChain, Hugging Face, TensorFlow, Scikit-learn, NLP

Generative AI: RAG Pipelines, LLMs, Vector Databases, Prompt Engineering

Cloud and DevOps: Docker, Nginx, CI/CD, GitHub Actions, AWS, Git

Data & Testing: Pandas, NumPy, Matplotlib, Pytest, Postman, Jupyter Notebook

EXTRACURRICULAR ACTIVITIES

WildBeats Cultural Club, IIIT Kottayam

Aug 2023 – Apr 2024

Sub-Lead

- Managed end-to-end logistics for Apoorv cultural fest (1,500+ attendees), coordinating 20+ volunteers and cross-functional teams for seamless execution.

ACHIEVEMENTS

- Solved **350+** problems on LeetCode, strengthening problem-solving, debugging, and complexity-analysis skills.
- Shortlisted at **SIH 2024 Internal Hackathon** for *SchemeHub*, an AI-powered government scheme discovery platform.
- Engineered a **HealthTech solution** at **Hackzilla**, pitching to judges among **200+ competing participants**.
